About Company

Guangzhou Skydance Co.,Ltd was founded in 2014 located in Guangzhou, China. We are specialized in research and development of Lighting Control system. We are a national high-tech enterprise. We insist to use the highest quality component and the strict quality control technique to ensure the reliability and long life of our products; we take pride in designing each product with the goal of providing the best lighting control performance possible in its price range.

Skydance dedicates to producing a variety of LED lighting control solutions, including RF wireless system , DMX512 system, AC Triac system, 0/1-10V system, DALI system, Sensors , Power repeaters, SPI dimmers, etc. Which are compatible with systems of Lutron, Philips, Osram, Dynalite ,Schneider, ABB, Leviton, JUNG, Berker, etc.

Skydance devotes to develop products with state-of-the-art technologies. With R&D team support, we launch new products every month.

The R&D team has abundant experience in industrial design, electronic driver, heat simulation analysis, light control system. We own many patents and designs which give us a unique presence in the lighting control field. All the products we design fully follow UL and EU electrical safety standards.

Company Images

Skydance has complete SMT process equipment and advancedproduction equipment such as wave soldering tin furnace and laserengraving machine. It has AOI automatic optical inspection machine,a number of advanced testing equipment such as semi-finished and finished producttesting and aging testing systems have laid a solidfoundation for high-efficiency and high-quality production and ensuredthe quality of finished products.

- Material inspection
- Inspection during production
- 100% inspection of finished product
- Regular maintenance of production and testing equipment
- 5 Years warranty

Patent Certification

SKYDANCE has own R&D department, and new products come out every month. Our products have won many patent awards, including design patents, utility model patents, etc. We accept OEM/ODM customization and have long business relationship with many famous brand customers.

Global Certification

Skydance has used advanced science and technology, rigorous manufacturing process, and perfect quality management system in the process of R&D and manufacturing, and has passed ISO, CE, authoritative quality system certification and product certification such as ROHS, REACH, EMC and TUV. 100% of the products produced by Skydance has undergone strict quality inspection, and the product quality assurance is 5 years.

International Sales

120+ **Product patents**

More than 120 products have passed the national patent

800+ **Self-developed products**

Extensive experiences of researching and developing new products

130+ **Sell to countries**

Distributed worldwide, gained great share of the market and popularity

12000+ **Factory area**

A wide area, and with good production capability

300+ **Staffs**

A team that prides itself on high quality manufacture and service

100W+ **Users**

Serving over 1 million customers worldwide

Certifications

Our products are certified and built to work for global market

Awards

Our products participate and have won awards worldwide

Project Case

At present, SKYDANCE has provided 1 million+users around the world with intelligent control systems and products for home and commercial use, combining innovative technology and high-quality services. It brings a better intelligent lightingcontrol experience to users.

Skydance lighting control system
is used in **Tens of thousands**
of lighting projects around the world

Home lighting

Skydance RF wireless control, voice + remote control, induction and other series of lightingcontrol systems and products, with their intelligent and convenient advantages, help global users to create a combination of lighting and decoration and beautification. It can meet theneeds of users of different ages and different functions, such as illumination, color temperature and atmosphere, so that users can enjoy the relaxed, happy and warm home.

Office lighting

Skydance is committed to creating a healthy, comfortable and vibrant office lighting environment for users, helping employees improve work efficiency and creativity, reducing work pressure and physical fatigue of employees, and at the same time Leverage technological innovations to helpbusinesses save electricity, reduce carbon emissions, and provide ease of maintenance.

Commercial lighting

Skydance has a flexible commercial lighting control system and products, which can help users create a suitable illumination and create a comfortable business atmosphere, and at the same time highlight the characteristics of the displayed products and enhance the art. It plays a guiding role and attracts the attention of consumers. Therefore, it is widely used in commercial stores such as hotels, restaurants, clothing stores, jewelry stores, and 4S stores.

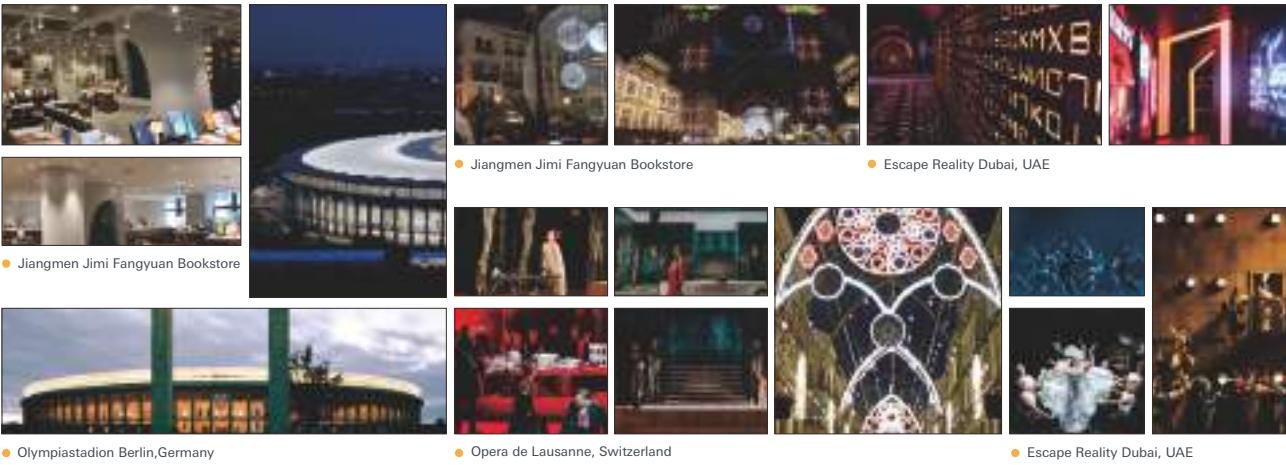

Outdoor space

Skydance lighting control systems and products takeinto account both functionality and aesthetics, and canhelp users create festival celebrations. architectural nightscenes, public information and advertising signs in the form of artistic lighting, while meeting the needs of energy conservation and environmental protection, createsa light environment that is pleasing to the eye and fully reflectsfully reflects the characteristics of buildings, roads or places and times.

Culture and art

Skydance lighting control system is also widely used in the field of culture and art. By controlling the color, brightness, dynamic mode, etc. of the lights, unique visual effects and artistic atmosphere are created, enhancing the artistic appeal of the performance, highlighting the artistic value and beauty of the exhibits, and provides a better viewing experience for the audience.

Wireless

Skydance RF wireless system has been designed to meet the lighting control requirements of residential applications including reliability, aesthetics, functionality, and ease of use and installation. Its completely scalable architecture and RF technology means that it is suitable for new or retrofit applications ranging from individual rooms or offices to entire residences. With a capacity of over 1000 devices RF Lighting Control has practically unlimited system capacity.

Auto-synchronization

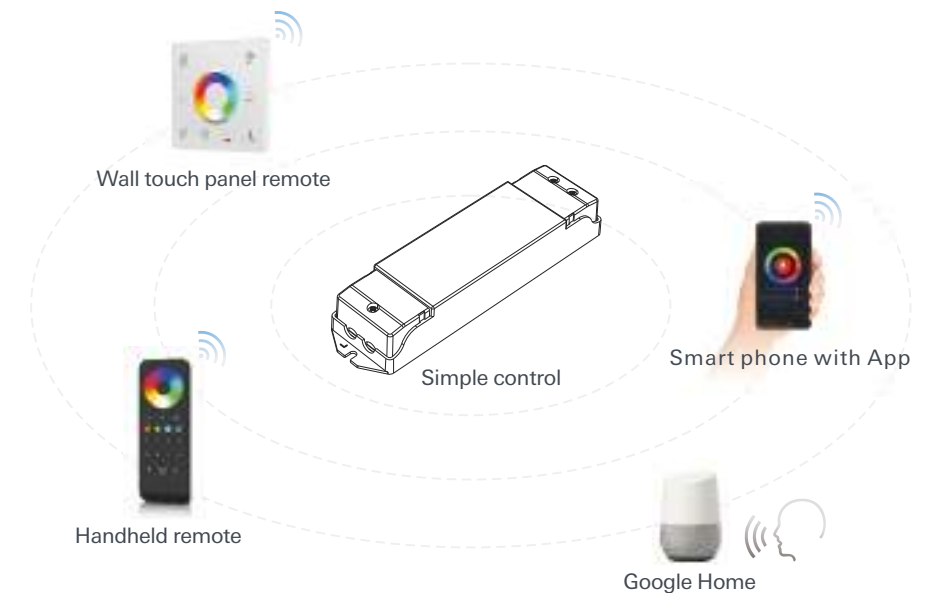

► Complete and Utter Control

Skydance RF Lighting Control offers a wide range of devices to extend the system functionality including RF wireless handheld remotes, touch panel remote & controller, PWM LED controllers, Wi-Fi converters, Wall switches, Dimmers, DMX decoders, etc, to achieve light effects of brightness, color temperature, RGB, RGBW, and RGB+CCT.

► Multiple Control Options

With our 2.4 GHz Wireless technology, you can control all kinds of lights by connecting to Wi-Fi, smart phones, panel dimmers, and remote controls. We meet our customers' needs by providing a variety of methods to control their lights.

RF LED Controller & Remote

- ✔ 0-100% Smooth dimming
- ✔ 30m remote control range
- ✔ Zone control and separate control
- ✔ Multiple scenes preset

Loaded with Memory

Each Skydance's controller has 32KB of flash memory, with more than enough space to run complex software smoothly, manage secure updates and store as many settings as needed.

This memory also allows the light to be loaded with dynamic light modes such as mesmerizing deep dive, fun and light-hearted pastel colors, RGB jump, RGB smooth, 6-color smooth, yellow cyan purple smooth, RGB fade in and out, red fade in and out, green fade in and out, blue fade in and out, or white fade in and out, so that you can continue enjoy lighting ambiances modes after the power restart.

Favorites for Every Space

The Scene buttons on the remote and App let you set custom favorite modes for each space. Pushing the favorite scene 1 button in your living room can set a different light mode for your bathroom or bedroom. What's more, our patented feature makes favourite scene on APP don't effect the scene on your existing remotes and switches.

Wireless Group Control in Multiple Zones

Multiple LED lights with LED controller can be group controlled by one remote at the same time. Press one single zone button to select one or multiple lights in one room. Remotes can have 1-8 zone buttons depending on the series. Even more, you can select up to 16 different zones in the SkySmart App on your phone through Wifi-Relay converter.

► RF LED Controller(RGB+CCT)

> 5 channel constant voltage output

> Match with SKYDANCE RF 2.4G single zone or multiple zone remote control

> 4096 levels 0-100% dimming smoothly without any flash

> Light on/off fade time 0.5s/3s selectable

> Built in 10 dynamic mode, include jump or gradual change style

V5-L
114×38×20MM

- 5 in 1 function, for single color/dual color/RGB/RGBW/RGB+CCT LED strip light
- PWM: 500Hz/2KHz/8KHz/16KHz
- Push switch control

V5-M
114×38×20MM

- For RGB+CCT LED strip light
- PWM: 1KHz/2KHz/4KHz/8KHz
- DC adapter power input optional

V5
175×45×27MM

- For RGB+CCT LED strip light
- PWM: 1KHz/2KHz/4KHz/8KHz
- Push switch control

V5-T
97.5×46×20MM

- 5 in 1 function, suitable for single color, color temperature, RGB, RGBW, RGB+CCT LED strips
- Support 3 buttons to turn on/off the light, adjust brightness, color temperature, RGB color, dynamic mode and speed
- Support touch color wheel to adjust brightness, color temperature or RGB color
- PWM:2KHZ

V5-WPM IP67
87×35×29MM

- IP67 rating, internal gluing, suitable for outdoor and damp environment
- 2-button operation, support on/off light, adjust brightness, color temperature, color, dynamic mode and dynamic speed
- PWM:2KHZ

V5-PD
70×34.5×15MM

- One button for on/off, RGB color, color temperature and brightness adjustment
- 4096 levels 0-100% dimming smoothly without any flash
- PWM:2KHZ

- WiFi & RF 3-in-1 constant voltage rotary panel LED controller
- For single color, color temperature, RGB LED strip light
- Tuya smart APP control, Voice control, RF 2.4G remote control
- Support on/off, brightness, color temperature, RGB color adjustment, delay turn on/off light, timer run, scene edit and music play function
- Rotate knob to change brightness, color temperature or RGB color, support short press, double press or long press operation
- PWM: 2000/8000Hz
- Can be used as a remote control

Wi-Fi & RF AC Triac Dimmer

- > Tuya APP cloud control, Voice control, Push Dim control, RF remote control
- > Leading edge or trailing edge dimming settable via DIP switch
- > Connect with external push switch to achieve on/off and 0-100% dimming
- > Light on/off fade time 0.5/3s selectable

S1-B(WT) 52 X 52 X 26MM

- Min brightness can be set by key
- To dim and switch single color dimmable LED lamps, traditional incandescent and halogen lights

SS-B(WT) (Non-dimmable) 52 X 52 X 26MM

- To switch single color LED lamps, traditional incandescent and halogen lights

Wi-Fi & RF Smart AC Switch

SS-L(WT) 56 X 56 X 25MM

- Wi-Fi + RF + AC push smart switch, just on/off
- Work with RF 2.4G dimming remote control
- Tuya APP cloud control, voice control, RF remote control, push switch control
- With delay turn on/off light and timer run function
- To switch single color LED lamps, traditional incandescent and halogen lights
- High-inrush specification relays (normally open)

SS-C(WT) 52 X 52 X 26MM

- WiFi & RF relay switch, 10A dry contact main rated relay output, zero cross switching function
- Tuya APP control, voice control, RF remote control, push switch control
- Support on/off, delay turn on/off and timer run function
- High-inrush specification relay
- Can also work as WiFi-RF converter

► Zigbee Microwave Induction Switch

- Ceiling mounting microwave motion detectors
 - Output Zigbee 3.0 signal, intelligent linkage to turn on/off other Tuya Zigbee or WiFi series lighting controllers
 - Tuya APP cloud control, support motion detection sensitivity, light sensitivity, time delay on/off, timer operation and intelligent linkage to other devices
- High voltage AC input, High voltage AC relay output with zero-cross detection
 - Output 1 channel 0/1-10V signal, connect with 0/1-10V dimmable driver
 - Output RF 2.4G signal, to control Skydance RF dimmer

► Zigbee Constant Current Dimmable LED Driver

- Universal AC input / Full range
 - Tuya APP control, Voice control
 - Compatible with Philips HUE bridge Zigbee 3.0 remote or scene panel
 - 256 levels 0-100% dimming smoothly without any flash
 - Full protective plastic case
- 1 channel or 2 channel constant current output, configurable current via DIP switch
 - With delay turn on/off, timer run, scene edit, sleep wake-up and birorhythms function
 - Synchronize on multiple number of LED drivers
 - Suitable for indoor LED lighting application

AC Triac Series

AC Triac Dimming Series

Skydance offers a complete AC Triac control system that contains Triac dimmer/ switch, Triac dimmable LED driver, and DMX512 Triac Converter. The Triac dimmer with AC input and AC output to dim and switch single color dimmable LED lamps, traditional incandescent and halogen lights. It is also compatible with a variety of single color RF remotes. The Triac dimmable LED driver is controlled by AC Triac dimmer. Triac dimmable LED driver supports to dim the LEDs' brightness from 0 to 100% without any flicker. They are all compatible with major control systems of Lutron, Dynalite, Clipsal, Osram, Philips, ABB, Schneider, Siemens, Berker, legrand etc.

AC Triac Switch

- > RF + AC push smart switch, just on/off
- > Work with RF 2.4G dimming remote control
- > Connect with external push switch optional
- > To switch single color LED lamps, traditional incandescent and halogen lights

Surge Current Suppressor

- When surge current occurs in the circuit, the NTC is instantly heated, the resistance drops rapidly, playing the role of current limitation and hindering the conduction of inrush current
- Used in series with triac dimmer to protect the safety and stable operation of triac dimmer
- High sensitivity, small size, high reliability, low cost, easy to install and use

- Maximum working current is 8A, and inrush current can be suppressed to a maximum of 20A
- Built-in bypass relay
- Built-in thermal fuse for thermal protection
- Used to reduce the high start-up current generated by loads such as LED dimming drivers and LED dimmable lamps

► AC Triac dimmer

- Input signal: DMX512 / knob / RF / 1-10V / Push switch / DALI
- 1 channel Max 6A output, AC phase-cut mosfet dimmer
- Digital numeric display, set DMX decode start address by buttons
- Reverse-phase dimming or forward-phase dimming selectable
- Minimum brightness set from 5% to 40%
- Rotate knob to change brightness, support push, push twice and long push operation
- Apply for single color dimmable LED lamps, traditional incandescent and halogen lights dimming/switch

DMX Control Series

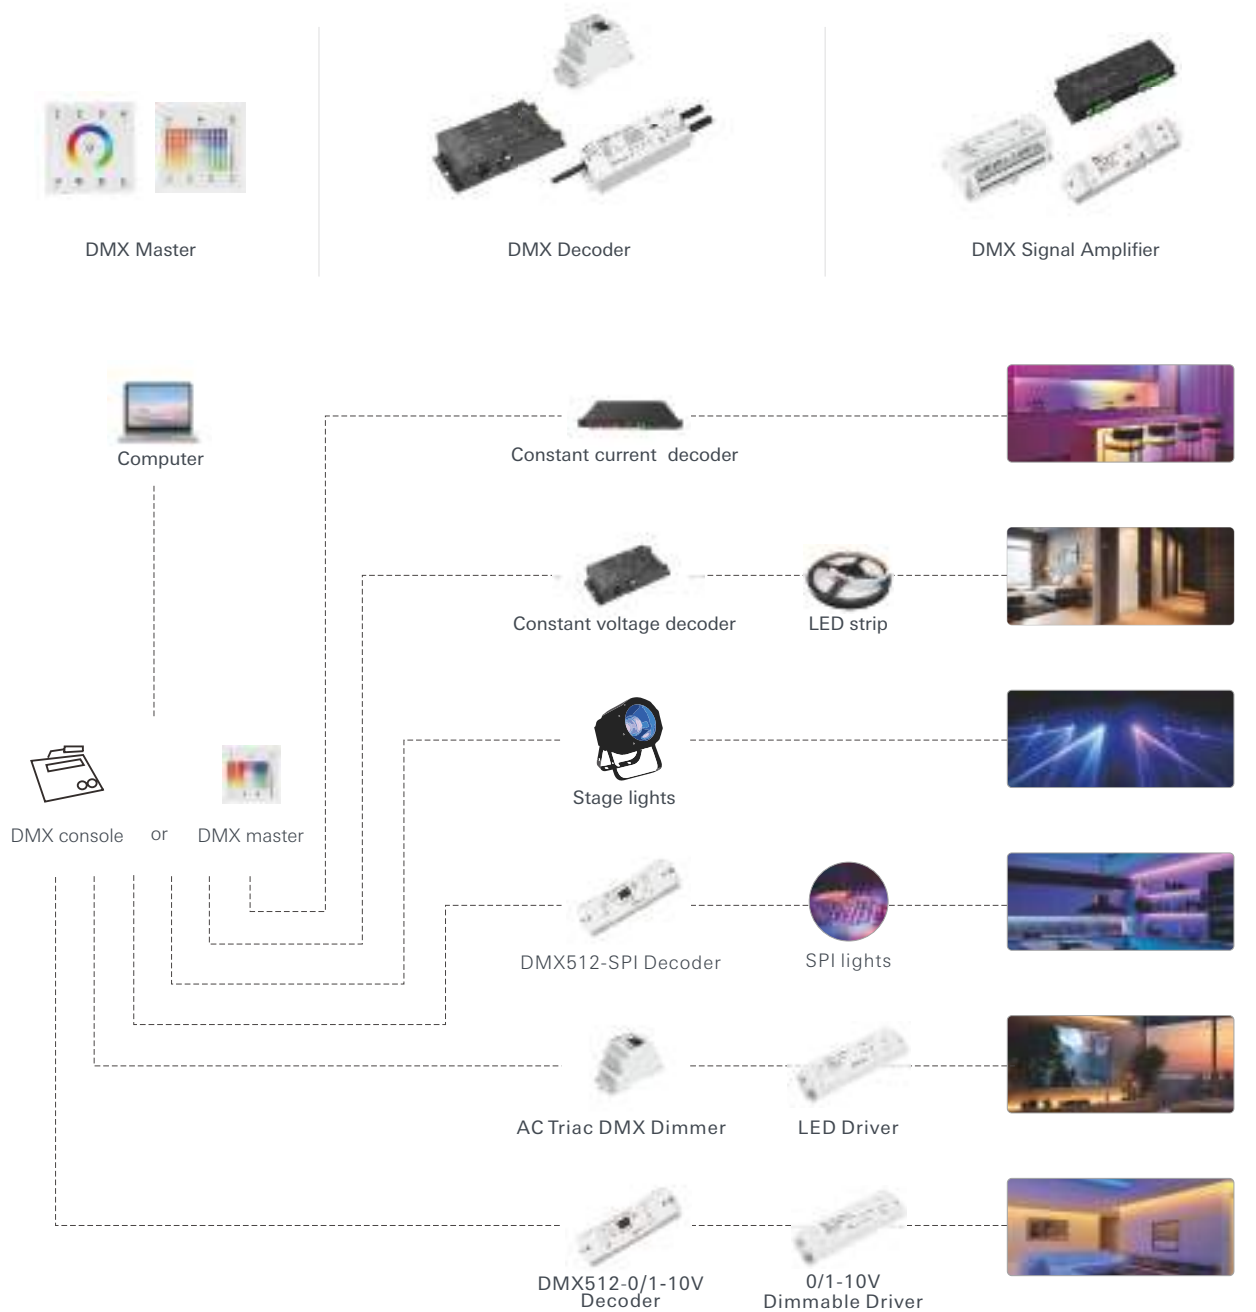

DMX512 Control System

Skydance DMX controllers are designed with the latest DMX512, DMX512(1990), DMX512-A and RDM standard protocols which enable users to set DMX address, choose output channel quantity, PWM output frequency and output brightness curve manually.

The advanced RDM decoder features bi-directional communication function which enables DMX console to detect decoder, displays decoder information and sets DMX address.

The DMX lighting control system consists of DMX console(DMX master) that sends DMX control signal and DMX decoder(DMX slave) which receives the control signal and outputs PWM signal to connected LED lights. Furthermore, with an additional DMX Signal Amplifier DA, the DMX control signal will be double extended.

With built-in RF 2.4G module, the DMX master can be controlled by a variety of single color, dual color, RGB, RGBW,RGB+CCT Remotes.

Malfunctions	Causes	Troubleshooting
No light	1. No power. 2. Wrong connection or insecure.	1. Check the power. 2. Check the connection.
Wrong color	1. Wrong connection of R/G/B/W wires. 2. DMX decode address error.	1. Reconnect R/G/B/W wires. 2. Set correct decode address.
Uneven intensity between front and rear, with voltage drop	1. Output cable is too long. 2. Wire diameter is too small. 3. Overload beyond power supply capability. 4. Overload beyond controller capability.	1. Reduce cable or loop supply. 2. Change wider wire. 3. Replace higher power supply. 4. Add power repeater.

0/1-10V Series

0/1-10V System

The 0/1-10V series perfectly solves the problem of compatibility between the fluorescent lamp dimming system and LED lighting. SKYDANCE 0/1-10V series products have a built-in high-performance MCU that supports five-in-one dimming, and 0~100% dimming range.

Logarithmic characteristic dimming, compatible with various brands of 0/1-10V dimmers and control systems on the market, such as Lutron, EVITIN, Schneider, etc. SKYDANCE 0/1-10V series includes 0/1-10V panel dimmer, RF or DMX to 0/1-10V signal converter, 0/1-10V low voltage dimming driver, 0/1-10V dimming constant voltage power supply, 0/1-10V dimming constant current power supply and other products, provide a complete 0/1-10V lighting control System solution.

DALI Series

DALI LED Dimmer Series

SKYDANCE DALI 1/4-channel PWM constant voltage dimmer is compatible with DALI standard protocol IEC 62386-102, IEC 62386-207, DC12/24V constant voltage power supply, 1/4 DALI address, 1/4 PWM constant voltage output, DALI address is automatically assigned by DALI master control, or set by digital tube button.

DALI protocol (Digital Addressable Lighting Interface) is an international standard lighting control communication protocol, with overall dimming, group dimming, addressing dimming, and multiple scenarios mode settings ect powerful dimming functions, can monitor and control each device through two-way data exchange. SKYDANCE DALI dimming series products comply with the IEC62386 standard, and can be connected with any device conforming to the DALI protocol on the same bus control, with strong compatibility. Including DALI master, DALI dimmer, DALI switch, DALI triac dimmer, DALI 0/1-10V dimmer, RF & Wi-Fi & Zigbee DALI converter, DALI bus and DALI driver etc..

DALI Series

► DALI Bus Power Supply & Repeater

- Standard DALI protocol bus power supply, Maximum output current of 250mA to power the entire DALI line
- Work as DALI Signal Repeater, Up to 3 repeaters can be connected, DALI bus extension up to 1200 meters
- Multiple DA-PL in parallel to increase load on the DALI line
- Dual indicator design, bus status feedback to indicator light

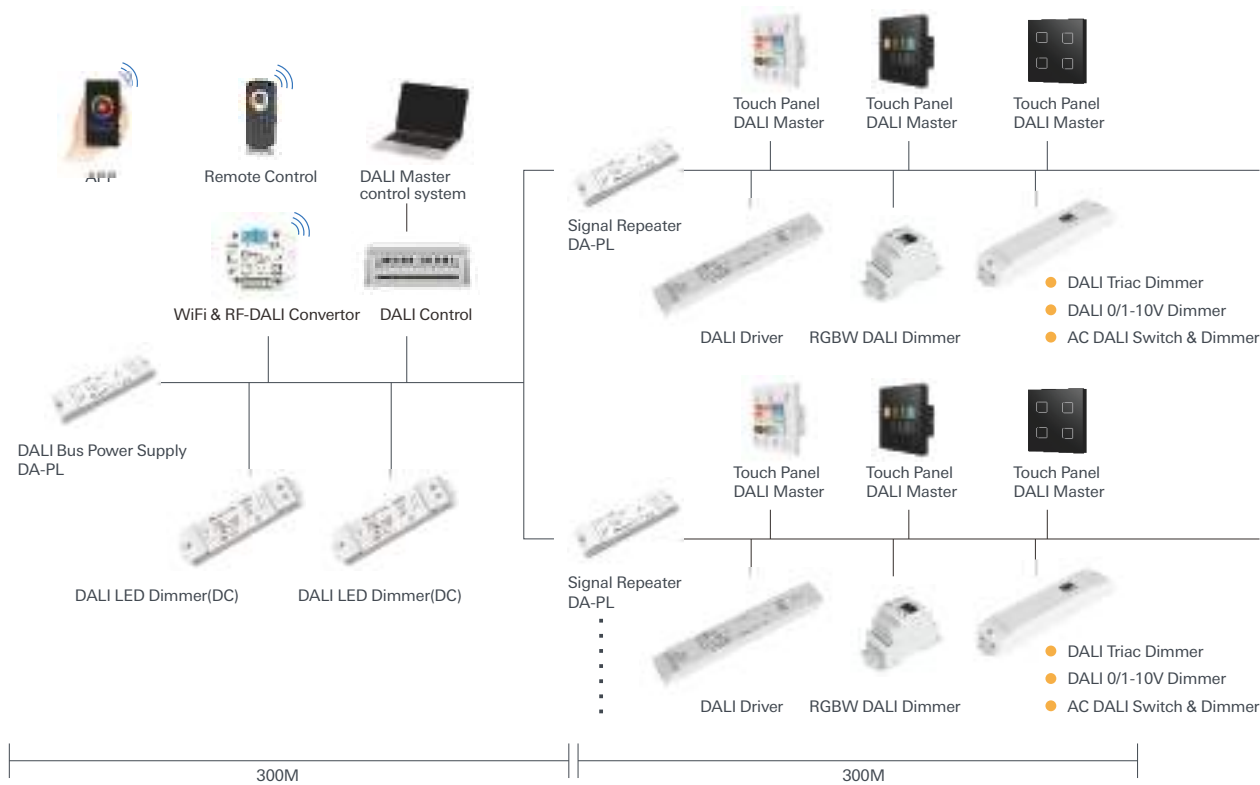

140 X 38 X 20.5MM

Model No.	DA-PL
Input Voltage	100-240VAC
Input supply frequency	50/60Hz
Input current	0.1A
Output current	Max. 250mA
Input/Output signal	DALI

Work as DALI Bus Power Supply and DALI Signal Repeater

Up to 3 repeaters can be connected in parallel to increase the load on the DALI line, and the DALI bus can be extended up to 1200 meters.

► DALI Broadcast Unit

- 4-in-1 DT6 and DT8 DALI broadcast unit for expanding DALI circuits
- Each broadcast unit occupies one DALI address and up to 64 broadcast units can be connected to one bus
- Receives DT6/DT8 commands from DALI main circuit as a control gear with a single address and forwards received DALI commands to all control gears connected to DALI OUT by broadcast DALI commands
- No DALI addressing required for the control gears connected to DALI OUT
- Output with DALI power supply (Max. 200mA)

135 X 38 X 20.5MM

Model No.	DA-PB
Input Voltage	100-240VAC
Input supply frequency	50/60Hz
Input current	0.1A
Output current	Max. 200mA
Input/Output signal	DALI

► Touch Panel Master

- 1 DALI address, 5 in 1 function(DIM, CCT, RGB, RGBW, RGB+CCT), 9 touch buttons
- In accordance with DALI standard protocol IEC 62386-101, 102, 207, 208, 209
- Adopts TFT 1.54-inch LCD color screen display, easy and intuitive setup and operation
- Enable to select DALI address, support unicast, group and broadcast mode
- Support on/off, color temperature and brightness adjustment, delay on/off light, scene function and dynamic mode

- Enable to select 4 different addresses for controlling by encoding switch
- Support scene, group, unicast and broadcast modes
- Each button with blue LED indicator
- Automatic blue backlight with proximity sensing to human fingers/palms.
- White & Black glass panel available

* With blue LED indicator, the panel backlight will be turned on when human fingers or palms close to the panel at < 5 cm, and the light will be brighter when buttons are being pressed.

- DT6
- Multifunction 4 in 1 dimming constant voltage LED controller, with DALI, 0/1-10V, AC Push and Triac dimming Interface
- 1 channel constant voltage output, 1 DALI address
- Support 0-10V or 1-10V signal input
- Support Triac reverse-phase dimming or forward-phase dimming input
- Connect AC push switch for on/off and 0-100% dimming
- Set Triac or other dimming method via dip switch

► DALI AC Switch

- DT7
 - DALI-2 certified, in accordance with DALI standard protocol IEC 62386-102, IEC 62386-208
 - 2 channels AC output, 2 DALI address
 - The switching thresholds of the relay can be set on the DALI bus
 - Zero cross switching function, 2 independently output channels AC switch
 - DALI address can be set by button with digital display or by DALI master
 - To switch two LED lamps, traditional incandescent and halogen lights
-
- DT7
 - DALI-2 certified, In accordance with DALI standard protocol IEC 62386-101, 102, 208
 - 1 channel 10 A dry contact mains rated relay output, 1 DALI address
 - Powered by AC100-240V
 - High-inrush specification relays (single pole, normally open)
 - Zero cross switching function

► RF DALI Dimmer

- Can be used as a DALI bus power supply
- In accordance with DALI standard protocol , IEC62386-101,102, 207, 208, 209 and in compliance with DALI products from other international incorporation
- For RGB/RGBW/RGB+CCT light type, built in 10 dynamic mode include jump or gradual change style
- 1 DALI address, support DT6 dimming, DT8-TC color temperature, DT8-RGB, DT8-RGBW or DT7 switch
- Enable to select DALI address by encoding switch, support unicast, group and broadcast mode
- Connect with external push switch for on/off and 0-100% dimming
- Match with RF 2.4G single zone or multiple zone remote control

Sensor Series

Sensor Series

SKYDANCE sensor series include PIR Motion Sensor, microwave sensor, touch sensor, hand sweep sensor, and door sensor system. They are widely used in cabinets, ceilings, stairs, and doors. Light threshold, time delay, and standby time etc. function can be set. Products include sensor dimmers, sensor switches, stair light controllers, RF & 0/1-10V sensor dimmers, cabinet LED driver and a variety of sensor probes etc..Providing a complete sensor lighting control solution.

Warranty 5 years

1. With sufficient ambient light, the sensor does not turn on the light.

2. With insufficient ambient light, the sensor turns on the light when motion is detected.

3. After hold time, the light turns off if no motion detected.

4. After elapse of stand-by time, the sensor turns off the light if no motion detected.

► 32CH PIR Motion Sensor Stair Light Controller

- 32 Channel
- 4 lighting modes settable
- 1-8 level light speed and brightness adjustable
- Work with cv single color and RGB SPI Pixel led strips
- PIR motion sensor or push switch signal input
- Come with 2 PIR sensor,1 daylight sensor and 2 extension lines
- 2 stair light controllers can cascade

► 24CH PIR Motion Sensor Stair Light Controller

- 24 Channel
- Work with single color and RGB SPI Pixel led strips
- White light step must be used with ES-F step sub-controller,defaults 24 steps, can be set up to 72 steps
- 2 lighting modes settable
- 1-8 level light speed and brightness adjustable
- 2 groups different SPI(TTL) signal output

Application

► Dual PIR Sensor + Dual Push Button SPI Controller

- 4 lighting modes selectable
- Work with RGB or white light SPI Pixel led strips, Max 960 Pixel number
- Can drive 28 kinds IC digital RGB or white LED strip, IC type and R/G/B order can be set
- One push switch connect with multiple controllers for sequential switching control
- Multiple light colors and change types are selectable
- 1-8 level light speed and 1-10 level brightness adjustable
- Easy operation with 3 buttons
- Work with RF 2.4G remote control

ES-D(WT)

- * Tuya APP cloud control, Voice control
- * 4 APP painted segment color mixing selectable
- * APP custom rich dynamic effects selectable

► Dual Sensing 2CH LED Controller

- Use for single color or color temperature low voltage LED strip or other low voltage powered devices
- Compatible with a variety of sensing probes
- Connected to external self-reset switch
- DIP switch to set light type, daylight detection switch, delay light off time
- Can be applied to staircase light control, bedroom, living room, cabinet, wardrobe and other light control

* DIP switch to set light type, daylight detection switch, delay light off time

► PIR Motion Sensor Dimming Controller

- With daylight detection function
- 3 button operation, 6 indicator lights
- With 3 work modes, 5 level dimmer, 6 level timer function
- RF 2.4G single-zone or multi-zone dimming remote control optional
- 3M tape installation, easy and convenient
- Suitable for kitchen, cabinets, stairs, bedrooms, closets, living rooms, aisles and so on

Two sensor dimming controller must not be connected together to control the same LED strip

SPI Series

SPI Series

SKYDANCE SPI Symphony series products include RF SPI controller, WiFi RF SPI controller and SPI signal amplifier. The SPI controller or decoder adopts DC5-24V constant voltage power supply and outputs 1/2/3 SPI signal (DATA+CLK), Compatible with up to 47 RGB/RGBW chip types, R/G/B color sequence can be set, 40 dynamic change modes are supported, The maximum control point is 1024 pixels, bringing you a fantastic color experience.

Dual PIR Sensor + Dual Push Button SPI Controller

- 4 lighting modes selectable
- Can drive 28 kinds IC digital RGB or white LED strip, IC type and R/G/B order can be set
- Multiple light colors and change types are selectable
- Easy operation with buttons
- Work with RGB or white light SPI Pixel led strips, Max 960 Pixel number
- One push switch connect with multiple controllers for sequential switching control
- 1-8 level light speed and 1-10 level brightness adjustable

SPI RF Remote Controller

The SKYDANCE SPI RF remote control is specifically designed for RF RGB/RGBW SPI LED controllers. It features an ultra-sensitive RGB touch color ring for color selection. It enables you to set the color, change type, movement direction, speed and brightness of dynamic modes. Additionally, you can also set parameters such as the length of the light strip, chip type, and the color sequence of red / green / blue / white.

Power Repeater

Due to the voltage drop of constant voltage LED lights, in the LED lighting control system, as the transmission distance increases and the load cascade increases, the LED power supply driving ability is insufficient. The brightness at the end of the lamp drops significantly, which affects the consistency of the LED lamp output. By using a power repeater, accepting constant voltage PWM signal control to expand the output of the constant voltage controller Power to achieve synchronous control effect. Each PWM constant voltage controller can theoretically connect an unlimited number of constant voltage power repeater in series or parallel to control more monochrome, color temperature, RGB, RGBW And RGB+CCT constant voltage LED lights.

SKYDANCE constant voltage power repeater series adopt DC12/24/36/48/60V constant voltage led driver, 1/2/3/4/5 channel PWM constant voltage signal input, 1/2/3/4/5 channel PWM Constant voltage power 3KV photoelectric isolation between output, input and output. The constant voltage power repeater needs to be used with RF constant voltage controller, DMX constant voltage decoder, DALI PWM constant voltage dimmer, etc.

Power Repeater

- Apply with LED controller to extend power output to control more LED lights more stably
- 1/2/3/4/5 channel PWM constant voltage output options
- Power repeater in series or in parallel to expand output unlimitedly
- Reverse polarity protection, IP20 or IP67 waterproof rating

EV1	12-36VDC	12-36VDC	1CH*8A	12V<96W, 24V<192W 36V<288W	97 X 33 X 18
EV1-S	12-24VDC	12-24VDC	1CH*15A	12V<180W, 24V<360W	175 X 45 X 27
EV1-X	12-24VDC	12-24VDC	1CH*30A	12V<360W, 24V<720W	107 X 75 X 24.5
EV2	12-36VDC	2*(12-36)VDC	2CH*8A	12V<192W, 24V<384W 36V<576W	175 X 45 X 27
EV2-S	12-24VDC	2*(12-24)VDC	2CH*5A	12V<60W, 24V<120W	97 X 33 X 18
EV3	12-36VDC	3*(12-36)VDC	3CH*6A	12V<216W, 24V<432W 36V<648W	175 X 45 X 27
EV3-X	12-36VDC	3*(12-36)VDC	3CH*10A	12V<360W, 24V<720W 36V<1080W	107 X 75 X 24.5
EV4	12-36VDC	4*(12-36)VDC	4CH*5A	12V<240W, 24V<480W 36V<720W	175 X 45 X 27
EV4-X	12-24VDC	4*(12-36)VDC	4CH*8A	12V<384W, 24V<768W	107 X 75 X 24.5
EV4-WPS (IP67)	12-36VDC	4*(12-36)VDC	4CH*5A	12V<240W, 24V<480W 36V<720W	165 X 98 X 72
EV5	12-24VDC	5*(12-36)VDC	5CH*5A	12V<300W, 24V<600W	107 X 75 X 24.5
