Mechanical Structures and Installations

Match Remote Control (two match ways)

The touch panel controller can also match with the RF remote (optional).

End user can choose the suitable match/delete ways. Two options are offered for selection:

Use On/Off key

Match:

Turn on light, turn off, immediately press the On/Off key of the panel for 5s, then press on/off key (single zone remote)

or zone key (multiple zone remote) of the RF remote within 5s.

The LED indicator fast flash 3 times means match is successful.

Delete:

Turn on light, turn off, immediately press the On/Off key of the panel for 10s, delete all matched RF remote.

The LED indicator fast flash 6 times means all matched remotes were deleted.

Use Power Restart

Match:

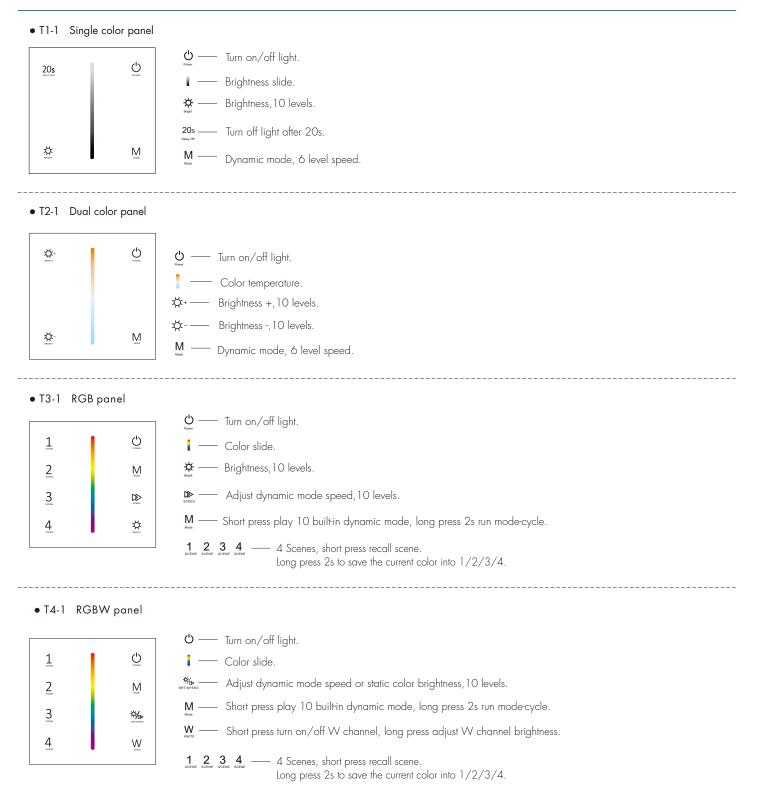

Switch off the power, then switch on power, repeat again, immediately short press on/off key (single zone remote) or zone key (multiple zone remote) 3 times on the remote. The light blinks 3 times means match is successful.

Delete:

Switch off the power, then switch on power, repeat again, immediately short press on/off key (single zone remote) or zone key (multiple zone remote) 5 times on the remote. The light blinks 5 times means all matched remotes were deleted

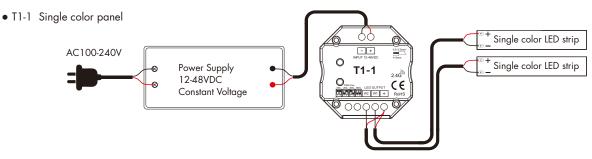

CE RoHS RED

Key function

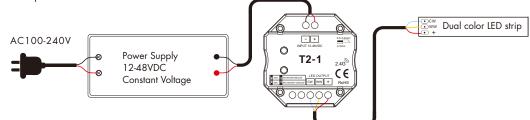

Turn on key tone: Long press power key for 5s when light is off, will turn on or turn off key tone(T1-1,T2-1 without key tone).

Wiring diagram

DIP switch select four PWM frequency: 1KHz, 2KHz, 8KHz or 16KHz. Higher PWM frequency, will cause lower output current, higher power noise, but more suitable for camera(No flickers for video).

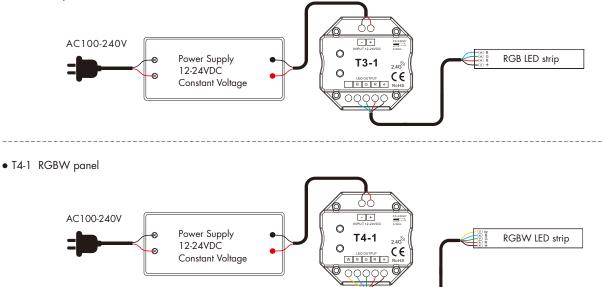

• T2-1 Dual color panel

DIP switch 1 select two PWM frequency: 2KHz or 8KHz.

Higher PWM frequency, will cause lower output current, higher power noise, but more suitable for camera(No flickers for video). DIP switch 2 select color temperature output mode: NW=50%VW+50%CW or NW=100%VW+100%CW.

• T3-1 RGB panel
